## Fall 2018 Newsletter

Summer 2018 ended up being the 6th wettest summer on record in Louisville, with a total of 18.74" of rainfall according to [weather.gov](http://weather.gov). The wettest summer on record in Louisville was the summer of 1875 with a total of 24.44" of rainfall. All that rain sure helped keep the lawn watering to a minimum, but now that Fall is here, there is still work to be done to keep our lawns healthy. Check out our Fall tips for keeping your lawn in great shape while getting ready for the end of the growing season.

### To Rake or Not to Rake?

That's one of the biggest questions we receive when it comes to fall lawn care. We recommend mulching your leaves instead of removing them completely from your lawn. By mulching with a lawnmower you're chopping the leaves into fine particles which will return vital nutrients to the soil. If leaves are left on the lawn for extended periods of time, it can harm your lawn. Leaves can block sunlight to the grass and prevent water evaporation which cause funguses, mold and diseases which could lead to dead spots in your lawn.

### Fall Lawn Care Checklist

- Aerate Lawns
- Broadleaf Lawn Care Application
- De-thatch Lawns

- Fertilize Lawn Care Application
- Mulch Fall Leaves
- Overseed Lawns

Fall kicks off the busy season of back to school, sporting events, and the Holiday Season. We'd like to take this time to say thank you for being a loyal customer. Best wishes for you and your families during this season and always.

If you have any lawn or landscape needs please don't hesitate to give us a call, text or email.
